

Jeremy Guido

Victoria, BC | jeremy.a.guido@gmail.com | 250-575-7251

Professional Summary

Mechanical engineer and technologist with experience in applied research, consulting, industrial refrigeration, and building energy analysis. Strong generalist across field investigations, modeling, mechanical design, and client reporting.

Work Experience

Camosun College, Victoria BC

Jan 2016 – Jun 2022

Applied Research Technologist II

- Technical lead for applied research projects involving mechanical systems, controls, and automation.
- Designed and reviewed mechanical concepts, performed analyses, and produced CAD drawings for fabrication and assembly.
- Participated in client meetings, project scoping, and technical reviews.
- Supported process improvements and mentored junior technologists.

Accent Refrigeration, BC

Jun 2016 – Jul 2018

Design Technologist

- Designed industrial refrigeration packages and coordinated fabrication and installation.
- Produced P&ID, mechanical, and electrical drawings in accordance with industry standards.
- Conducted site visits and supported upgrades to meet regulatory and operational requirements.

Focal Engineering, BC

Jun 2022 – Jul 2023

Mechanical Engineer

- Collaborated with senior energy modelers to develop and calibrate building energy models.
- Reviewed architectural, electrical, and mechanical design documents to extract energy performance inputs.
- Prepared reports summarizing modeling inputs, methodologies, and results for project teams and clients.
- Supported technical calculations, mechanical design development, drawing production, and energy input/output database maintenance.

Polar Engineering, Victoria and Vancouver BC

Aug 2023 – Jan 2026

Project Engineer

- Delivered energy audits and feasibility studies for existing buildings and industrial facilities across British Columbia.
- Built spreadsheet-based energy and emissions models to assess conservation, electrification, and decarbonization options.
- Developed retrofit concepts (industrial refrigeration, heat recovery, low-carbon systems) and coordinated vendor inputs.
- Produced technical reports, grant documentation, and client presentations; conducted site visits to validate performance.

Education

University of Victoria, Victoria BC

Sept 2018 – Dec 2021

Bachelor of Engineering

Camosun College, Victoria BC

Sept 2015 – May 2017

Mechanical Engineering Technologist

Okanagan College, Kelowna BC

Jan 2008 – Jul 2012

Red Seal Chef

Center for Arts and Technology, Kelowna BC

Jul 2005 – Aug 2007

Diploma in Video Game Art and Design

Personal Projects

- Liquid-fueled rocket engine design and test platform developed to validate designs against established rocketry standards.
- Custom electronic GoTo telescope mount controller and independent prototyping across 3D printing, electronics, woodworking, and leather fabrication.

Relevant Skills

CAD

AutoCAD, SolidWorks, Inventor

Programming

Python, C, C++, MATLAB

Office Productivity

MS Office, L^AT_EX, Slack, Teams

Manufacturing

CNC machines, laser cutters, waterjet cutters

Image Editing

Photoshop, Illustrator
